Allowable Subject Matter

Claims 8-13, 15-22, 24-30, 32-34, and 56-67 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to point out or render obvious a method for improving wear resistance to the outer surface of spray application equipment including titanium and aluminum bell cups comprising: preparing the outer surface of the spray application equipment; placing the spray application equipment in a chamber containing a power source and a gaseous mixture of hydrocarbons and silicon, titanium or tungsten doped hydrocarbons; and applying a predetermined frequency and voltage bias from the power source for a predetermined time to coat the outer spraying surface of the spray application equipment with a silicon, titanium or tungsten doped hydrocarbon composition at a predetermined film thickness.

Japanese Patent No. 361035868 A to Tate teaches the application of a nitriding or alumite treatment to aluminum alloy bell cups to improve abrasion resistance, but does not teach the use of silicon, titanium or tungsten doped hydrocarbon coatings.

- U.S. Patent 4,902,535 to Garg et al. teaches application of hard carbon coatings to titanium surfaces, but does not teach or suggest application to spray application equipment or bell cups.
- U.S. Patent 5,458,927 to Malaczynski et al. teaches application of hard hydrogen-containing carbon coatings to an aluminum-alloy work piece such as a piston or engine block, but does not teach or suggest application of silicon, tungsten or titanium doped carbon coatings to spray application equipment or bell cups.
- U.S. Patent 4,919,773 to Naik teaches application of a hard carbon coating to titanium or steel turbine components using a chromium interlayer, but does not suggest application to spray application equipment or aluminum-alloy bell cups.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1763

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberts Culbert whose telephone number is (571) 272-1433. The examiner can normally be reached on Monday-Friday (7:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Mills can be reached on (571) 272-1439. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
